

## ND UVC measuring device model S

Disinfection – Without chemicals

### **UVC** Måler

ND UVC measuring device model S is a user-friendly radiometer for measuring UVC. ND UVC measuring device model S is a compact radiometer that can test whether the UV solution transmits the desired UVC dose at the desired distance. The UVC measuring device model S gives us data on how the UVC lamps work and whether they are decreasing in efficiency.

#### ND UVC measuring device model S:

- → Compact unit
- → User-friendly
- → Long operating time

#### Description:

- → User-friendly radiometer for measuring UVC
- → Low cost
- → Alphanumeric display
- → Compact design
- → Low power consumption
- → Long operating time
- → Used with digital sensor
- → In practical case
- → Sensor is calibrated once a year

# ND UVC measuring device model S

Disinfection - Without chemicals

#### Teknisk information:

Specifications Specifications may vary based on individual configurations	
Product name	UVC Measuring device model S
IP	65
Operating temperature	0-40°C
Measuring range	0,01-250 W/m <sup>2</sup>
Measuring range	0,1-500 W/m <sup>2</sup>
Calibration	ÖNorm M5873-1
